Proposal – Alex Car Restoration Operations System

Prepared for Alex Car Restoration · Oct 31, 2026 · @Jig

What you get

One system for the whole shop. Every car, from the first call to the day it leaves, with who is working on it, what is next, and how long is left. It covers all four services: restoration, paint, detailing and ceramic coating. The owner sees how the business is doing, the service advisor sees what needs doing today, and the team leader sees who is on what.

What is included

- **Intake in one pass:** client, car with photos, drop-off checklist, job details, price and payment.
- **Estimate calculator:** labour, parts, materials and outside work and discount. Printable, and it can start the job.
- **Job tracking:** each job shown as a trip along its steps, with the crew, the next task and the days left. Stage approvals by the owner or advisor.
- **Quality check and release:** a checklist per service, before and after photos, and a gatepass that is held until the car is signed off, paid and has its papers.
- **Customers:** history, birthdays, where they came from, and follow-ups after the car leaves.
- **Daily view:** schedule, attendance and a daily summary the team can read in a minute.
- **Reports:** cars in and out, delays, back jobs and sales, with the owner's sales view kept private.
- **Three logins:** Executive, Service Advisor and Team Leader, each seeing only what they need.

Timeline

About 3 to 6 weeks from approval.

- **Week 1:** confirm the flow with your team, set up the database and logins.
- **Weeks 2–3:** build and test each part with real jobs from the shop.
- **Weeks 3–5:** connect text messages, train the team, move your current jobs in.
- **Weeks 4–6:** go live, with us on hand for fixes.

What we need from you: your price list, a list of staff and roles, a sample of the forms you use today, and one person who can answer questions during the build.

Investment

Item	Amount
Regular price: discovery, working demo, shared database, real logins, text messages, testing, training and go-live	₱ 350,000
Special price: the same package, in full	**₱ 115,000**

Payment: the full ₱ 115,000 is due upon successful deployment. There is no down payment. Successful deployment means the system is live and accepted: every item on the sign-off list is ticked, or 7 days have passed after go-live with no problem reported.

Not included: the domain name, hosting and text message charges. These are paid by Alex Car Restoration directly to the providers.

Monthly care plans (optional, start after the 30 free days):

	Care Plus
Monthly fee	₱ 6,000
Fixes for anything that stops working	Included
Reply time	Same working day
Monthly check of hosting, backups and the system	Included, with a review call
Help for a new staff member	1 session

Approval

- **Acceptance:** we agree a short sign-off list before the build starts. The system is accepted when every item is ticked, or 7 days after go-live unless you report a problem.
- **Changes:** up to two rounds of changes after testing are included. Anything more is quoted before work starts.
- **After go-live:** 30 days of free fixes for anything that does not work as described. After that, choose a monthly care plan (above), or pay ₱ 1,500 an hour as needed.

- **Your data and privacy:** your shop's data belongs to you. A mutual confidentiality agreement covers what you share with us.
- **Valid for** 30 days from the date above.
